### Poetry.

From Mickellar's "Dropings from the heart."

#### Let's sit down and Talk Together.

Let's sit down and talk together

Of the things of olden day,

When we like sunshine loosed from tether,

Gaily tripp'd along the way,

Time has touch'd us both with lightness,

Leaving furrows here and there,

And ringing with peculiar brightness,

Silvery threads among our hair.

Let's sit down and talk together

Many years away have passed,

And fair and foul has been the weather

Since we saw each other last.

Many whom we loved are living

In a better world than this;

And some among us still are giving

Tell and thought for present bliss.

Let's sit down and talk together

Though the flowers of youth are dead,

The ferns still grow among the heather,

And for us their fragrance shed.

Life has thousand blessings in it

Even for the aged man;

And Gom has lived in every minute

Something we may wisely scan.

Let's sit down and talk together

Boys we were—we now are men;

We shall meet, but know not whether

We shall need to talk again.

Parting time comes—how loaly

Speed the moments when their wings

Are fanned by breathings issuing sweetly

From a tongue that never stings!

The First Locomotive.

BY ONE WHO SAW IT.

By Charles A. Davis, of New York, the most successful imitator of the original Major Jack Downing.]

The writer, whose article appeared in the *Kirkeholder Magazine* some years ago, first gives some account of the first steamboat on the Hudson, to which he adds the following anecdote of the first steamboat that ascended the Mississippi.

"I have used up," said he, "plague nigh all the sheet iron, and old stove-pipes and mill-wheels, and tunnel heads, in those parts—but I've succeeded—and for fear that some of these 'entitled folks' around here may have got a peep through the key-hole, and will trouble me when I come to get a patent, I've sent it off to a friend in New York."
